The classical beauty of ribbed doors

Ribbed door designs have a classical appearance and blend in with most homes. Their tough and sturdy precision engineered construction offers maximum durability and timeless kerb appeal. For steel door options, please see pages 16 - 17.

The modern elegance of Georgian panels

Our superb range of Georgian panel style doors will look good on any house type, whether modern or traditional. All have deep, crisp panel profiles, which give them solid and sturdy characteristics combined with an elegant appearance.

10

11

12

13

10 Georgian
11 Beaumont
12 Beaumont with windows
13 Cathedral

Our Georgian, Beaumont and Cathedral style doors are also available in a timber-effect finish. This foil coating provides a woodgrain appearance whilst retaining the cost and maintenance advantages of a steel door.

Design Range

Garador Design Range doors are a truly modern range of Up & Over doors. The series 100 design range doors are built from four horizontal skins, whilst series 200 doors are built from three vertical skins.

101

102

103

107

108

109

Stainless steel elements on Garador design range doors are manufactured from high grade steel and feature a fine brushed finish.The series 100 and 200 design range doors are also available without stainless steel elements.

Both series feature a minimalistic door panel and have a wide range of stylish designs available. These doors are perfectly suited to new build properties and new buildings with contemporary architectural features.

All doors come with a high quality CFC free powder coating applied at our factory. On Design Range doors a choice of any standard colour comes free of charge. The new Titan Metallic colour is a structured metallic finish and exclusively available on Design Range doors. Please see page 16 for a choice of the 18 standard RAL colours available.

PVC Range

This UV-fast low gloss white finish looks great and the PVC panel provides sturdy impact resistance, ready to cope with life's little knocks. Built around the Garador box section chassis this ultra crisp fully finished PVC plastic door panel offers you engineering excellence with a material to perfectly match your PVC doors and windows.

1

2

1 Sherborne
2 Chatsworth

Low maintenance and long lasting
Our Sherborne and Chatsworth PVC Up & Over garage doors have been designed to provide a low maintenance and long lasting solution for any home.

UV-fast low gloss white PVC plastic
Constructed from a UV-fast low-gloss plastic, these doors offer an attractive and durable solution for any garage. They also provide a sturdy impact resistant panel ready to cope with life's little knocks.

Non-rusting PVC panel is ideal for coastal properties
Both these doors are ideal for coastal properties, as the sturdy and non-rusting PVC panel will withstand even the toughest weather conditions.

Matches existing white PVC doors and windows
The surface of the door panel is strong, crisp and elegant with its vacuum formed panels offering an attractive and very desirable finish and has been designed to match existing PVC doors and windows on your home.

GRP panel doors

Our GRP garage doors combine a great look with a long life and they are virtually maintenance free. Each GRP panel is fixed into our rigid box section chassis to provide a very stable door construction that will not twist or warp.

Timber panel doors

For some customers, there is no substitute for a timber garage door.
If you insist on the traditional values of craftsmanship and natural materials then the warmth and character of a timber door is certainly for you.

Insulation options

Garador Sectional doors are ideal for integral garages and workshops where thermal insulation can be very important. Available in Premium insulated option or the Classic single skinned version and a variety of surface finishes, including ribbed and panelled variations, these doors are the discerning buyer's choice.

Premium

To ensure the highest levels of thermal insulation and structural rigidity, each 42 mm thick double-skin steel section is evenly filled with 100% CFC-free PU rigid foam and a seal between each section.

Classic

Single-skin door sections are bonded on the inside to steel profiles without rivets. This special bonding technique produces excellent stability and quiet door action.

10 Timber-effect Golden Oak in foil coat or deco paint finish
11 Timber-effect Rosewood in foil coat or deco paint finish

The aluminium profiles of our roller garage doors are filled with a CFC-free polyurethane foam which provides a good thermal insulation to enhance energy savings and contributes to a quiet door action.

Profile with thermal insulation
The aluminium profiles are 77 mm high and are filled with polyurethane rigid foam for strength and a quiet door travel.

Window
Add a window for an individual design and the use of daylight in your garage. The number of elements depends on the respective door width. A maximum of ten profiles can be fitted with glazings in each door.

Ventilation grilles
Ventilation of your garage improves the room climate and prevents mould. A maximum of ten profiles can be used for each door.

FrontGuard Entrance Doors

Garador FrontGuard doors are the best front doors available on the market today. With precision engineering, high security and stylish designs, these doors are a great choice for your home.

SBD – Secured by Design
Secured by Design is an association focusing on the design of more secure homes and commercial properties. Secured by Design is owned by the ACPO (Association of Chief Police Officers) and awards the Secured by Design status to products that pass their extensive testing procedures.

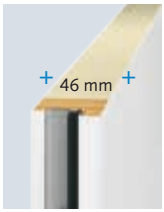

Secured by Design is available as an option on most of our front door designs.

High Thermal Insulation

Insulation has become of increasing importance over the last decade. A thermal efficient front door can help reduce your energy costs.

Find the results from our thermal efficiency tests in the main FrontGuard brochure.
